Human CD32a / FCGR2A Protein (167 His, His Tag)

Catalog Number: 10374-H08C1

General Information

Gene Name Synonym:
CD32; CD32A; CDw32; Fc gamma RIIA; FCG2; FcGR; FCGR2; FCG2A1; IGFR2

Protein Construction:
A DNA sequence encoding (Met 1-Ile 218) of human CD32a (NP_001129691.1) was expressed with a C-terminal polyhistidine tag. It is identical to FCGR2A131H/R in the reference.

Source: Human

Expression Host: CHO Cells

QC Testing

Purity: > 95 % as determined by SDS-PAGE

Bio Activity:
Measured by its binding ability in a functional ELISA. Immobilized human CD32a-His (R131H) (CHO) (Cat:10374-H08C1) at 10 μg/ml (100 μl/well) can bind biotinylated human IgG1, The EC_{50} of biotinylated human IgG1 is 0.09-0.21 μg/ml.

Endotoxin:
< 1.0 EU per μg of the protein as determined by the LAL method

Stability:
Samples are stable for up to twelve months from date of receipt at -70 °C

Predicted N terminal: Gln 34

Molecular Mass:
The secreted recombinant human CD32a consists of 196 amino acids and predicts a molecular mass of 22 KDa. The apparent molecular mass of the protein is approximately 29-32 KDa in SDS-PAGE under reducing conditions due to glycosylation.

Formulation:
Lyophilized from sterile PBS, pH 7.4.

Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization. Specific concentrations are included in the hardcopy of COA. Please contact us for any concerns or special requirements.

Usage Guide

Storage:
Store it under sterile conditions at -20 °C to -80 °C upon receiving. Recommend to aliquot the protein into smaller quantities for optimal storage.

Avoid repeated freeze-thaw cycles.

Reconstitution:
Detailed reconstitution instructions are sent along with the products.
