Flow cytometric analysis of Human PD-1 (CD279) expression on human whole blood Lymphocytes. Cells were stained with PE-conjugated anti-Human PD-1 (CD279). The fluorescence histograms were derived from gated events with the forward and side light-scatter characteristics of viable Lymphocytes.

Flow cytometry was performed on a BD FACSCalibur flow cytometry system. Please refer to www.sinobiological.com/Flow-Cytometry-FACS-Protocols-a-750.html for technical protocols.
