### General Information

**Immunogen:** Recombinant Human Complement Factor H / CFH Protein (Catalog#10714-H08H)

**Preparation:**
This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a mouse immunized with purified, recombinant Human Complement Factor H / CFH (rh Complement Factor H / CFH; Catalog#10714-H08H; NP_000177.2; Ser 860-Arg 1231). The IgG fraction of the cell culture supernatant was purified by Protein A affinity chromatography.

**Ig Type:** Mouse IgG1

**Clone ID:** 4B6E1

**Specificity:** Human Complement Factor H / CFH

**Formulation:**
No cross-reactivity with Human cell lysate (293 cell line) in ELISA.

**Storage:**
This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Preservative-Free. Sodium azide is recommended to avoid contamination (final concentration 0.05%-0.1%). It is toxic to cells and should be disposed of properly. Avoid repeated freeze-thaw cycles.

### Applications

**Applications:** ELISA

**Recommended Concentration**

**ELISA:**
ELISA: 1:1000-1:2000
This antibody can be used at 1:1000-1:2000 with the appropriate secondary reagents to detect Human CFH.

*Please Note: Optimal concentrations/dilutions should be determined by the end user.*
