**GENERAL INFORMATION**

**Immunogen:** Recombinant Influenza A H3N2 (A/Aichi/2/1968) Nucleoprotein / NP protein (Catalog#40207-V08B)

**Preparation**
Produced in rabbits immunized with purified, recombinant Influenza A H3N2 (A/Aichi/2/1968) Nucleoprotein / NP (Catalog#40207-V08B; AFM71861.1; Met1-Asn498). Influenza A H3N2 (A/Aichi/2/1968) Nucleoprotein / NP specific IgG was purified by Influenza A H3N2 (A/Aichi/2/1968) Nucleoprotein / NP affinity chromatography.

**Ig Type:** Rabbit IgG

**Specificity:** Influenza A H3N2 (A/Aichi/2/1968) Nucleoprotein / NP

**Formulation:** 0.2 μm filtered solution in PBS

**Storage:** This antibody can be stored at 2℃-8℃ for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20℃ to -80℃. Preservative-Free. Sodium azide is recommended to avoid contamination (final concentration 0.05%-0.1%). It is toxic to cells and should be disposed of properly. Avoid repeated freeze-thaw cycles.

**APPLICATIONS**

**Applications:** WB, ELISA, IHC-P, IP

(antibody’s applications have not been validated with corresponding viruses. Optimal concentrations/dilutions should be determined by the end user.)

**RECOMMENDED CONCENTRATION**

<table>
<thead>
<tr>

This antibody can be used at 1:5000-1:10000 with the appropriate secondary reagents to detect Influenza A H3N2 (A/Aichi/2/1968) Nucleoprotein / NP.

*Please Note: Optimal concentrations/dilutions should be determined by the end user.*
Anti-Influenza A H3N2 (A/Aichi/2/1968) Nucleoprotein / NP Protein rabbit polyclonal antibody at 1:1000 dilution. Sample: Influenza A H3N2 (A/Aichi/2/1968) Nucleoprotein / NP Protein Recombinant Protein Lane A: 30ng Secondary HRP Conjugated Goat anti-rabbit IgG (H+L) at 1/1000 dilution Performed under reducing conditions.
