Mouse VEGF/VEGFA/VEGF165 transcript variant 3 Gene ORF cDNA clone expression plasmid, C-His tag

Catalog Number: MG50159-CH

**General Information**

**Gene:** vascular endothelial growth factor A  
**Official Symbol:** VEGFA  
**Synonym:** Vegf; Vpf  
**Source:** Mouse  
**cDNA Size:** 441bp  
**RefSeq:** NM_001287058.1

**Plasmid:**

**Description**

**Lot:** Please refer to the label on the tube

**Sequence Description:**

**Restriction site:**

**Vector:** pCMV3-C-His

**Quality control:**

The plasmid is confirmed by full-length sequencing with primers in the sequencing primer list.

**Sequencing primer list:**

<table>
<thead>
<tr>

<td>5' TAATACGCTCATAGGG 3'</td>
</tr>
<tr>
<td>ReverseBGH:</td>
<td>5' TAGAAGGCGACAGTGCGAGG 3'</td>
</tr>
</tbody>
</table>

The plasmid is ready for:

- Restriction enzyme digestion
- PCR amplification
- *E. coli* transformation
- DNA sequencing

**Plasmid Resuspension protocol**

1. Centrifuge at 5,000 × g for 5 min.
2. Carefully open the tube and add 100 μl of sterile water to dissolve the DNA.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin to concentrate the liquid at the bottom. Speed is less than 5000 × g.
5. Store the plasmid at -20 °C.

**E. coli** strains for transformation (recommended but not limited)

Most commercially available competent cells are appropriate for the plasmid, e.g. TOP10, DH5α and TOP10F’.

Manufactured By Sino Biological Inc., FOR RESEARCH USE ONLY. NOT FOR USE IN HUMANS.

Catalog Number: MG50159-CH

Vector Information

All of the pCMV vectors are designed for high-level stable and transient expression in mammalian hosts. High-level stable and non-replicative transient expression can be carried out in most mammalian cells. The vectors contain the following elements:

• Human enhanced cytomegalovirus immediate-early (CMV) promoter for high-level expression in a wide range of mammalian cells.
• Hygromycin resistance gene for selection of mammalian cell lines.
• A Kozak consensus sequence to enhance mammalian expression.
