General Information

Gene: TNF receptor-associated factor 6
Official Symbol: TRAF6
Synonym: 231003F17Rik; AI851288; C630032O20Rik; RP23-313G3.1
Source: Mouse
cDNA Size: 1593bp
RefSeq: NM_001303273.1
Plasmid: pCMV3-mTRAF6

Description

Lot: Please refer to the label on the tube
Sequence Description:
Identical with the Gene Bank Ref. ID sequence.
Restriction site: KpnI + XbaI(6.1kb+1.59kb)
Vector: pCMV3-untagged
Quality control:
The plasmid is confirmed by full-length sequencing with primers in the sequencing primer list.
Sequencing primer list:

Plasmid Resuspension protocol

1. Centrifuge at 5,000 × g for 5 min.
2. Carefully open the tube and add 100 μl of sterile water to dissolve the DNA.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin to concentrate the liquid at the bottom. Speed is less than 5000 × g.
5. Store the plasmid at -20 °C.

The plasmid is ready for:

- Restriction enzyme digestion
- PCR amplification
- E. coli transformation
- DNA sequencing

E.coli strains for transformation (recommended but not limited)

Most commercially available competent cells are appropriate for the plasmid, e.g. TOP10, DH5α and TOP10F-.
Mouse TRAF6 Gene ORF cDNA clone expression plasmid

Catalog Number: MG57197-UT

Vector Information

All of the pCMV vectors are designed for high-level stable and transient expression in mammalian hosts. High-level stable and non-replicative transient expression can be carried out in most mammalian cells. The vectors contain the following elements:

• Human enhanced cytomegalovirus immediate-early (CMV) promoter for high-level expression in a wide range of mammalian cells.
• Hygromycin resistance gene for selection of mammalian cell lines.
• A Kozak consensus sequence to enhance mammalian expression.

Physical Map of Plasmid:

[Diagram showing the physical map of the plasmid with labels for vector name, vector size, vector type, expression method, promoter, antibiotic resistance, selection in mammalian cells, and protein tag.

Vector Name          pCMV3-untagged
Vector Size          6223bp
Vector Type          Mammalian Expression Vector
Expression Method    Constitutive, Stable / Transient
Promoter             CMV
Antibiotic Resistance Ampicillin
Selection In Mammalian Cells Hygromycin
Protein Tag          None
