Rat CTSL1 ORF mammalian expression plasmid, C-Flag tag

Catalog Number:  RG80646-CF

General Information
Gene: cathepsin L1
Official Symbol: CTSL1
Synonym: CatL, Ctsl, CATHL
Source: Rat
cDNA Size: 1005bp
RefSeq: NM_013156.2

Description
Lot: Please refer to the label on the tube
Vector: pCMV3-C-FLAG
Shipping carrier:
Each tube contains approximately 10 μg of lyophilized plasmid.

Storage:
The lyophilized plasmid can be stored at ambient temperature for three months.

Quality control:
The plasmid is confirmed by full-length sequencing with primers in the sequencing primer list.

Sequencing primer list:
pCMV3-F: 5’ CAGGTGTCCACTCCAGGTCCAAG 3’
pcDNA3-R: 5’ GGCAACTAGAAGGCACAGTCGAGG 3’

Or
Forward T7: 5’ TAATACGACTCATAAGG 3’
ReverseBGH: 5’ TAGAAGGCACAGTCGAGG 3’

The plasmid is ready for:
• Restriction enzyme digestion
• PCR amplification
• E. coli transformation
• DNA sequencing

E.coli strains for transformation (recommended but not limited)
Most commercially available competent cells are appropriate for the plasmid, e.g. TOP10, DH5α and TOP10F-.
Vector Information

All of the pCMV vectors are designed for high-level stable and transient expression in mammalian hosts. High-level stable and non-replicative transient expression can be carried out in most mammalian cells. The vectors contain the following elements:

- Human enhanced cytomegalovirus immediate-early (CMV) promoter for high-level expression in a wide range of mammalian cells.
- Hygromycin resistance gene for selection of mammalian cell lines.
- A Kozak consensus sequence to enhance mammalian expression.
